 Zinn-Justin, S. 917

Subject index

Active site

- human tumour necrosis factor, lymphotoxin, structure/activity studies 5
- lysozyme, fluctuation of for enzyme activity 743
- mutagenesis of cathepsin D, substrate specificity 495
- mutants, glucoamylase, specificity, sequence analysis 1479
- papain, catalytic triads 75
- papain, mutagenesis of residues remote from active site, role of two-domain interface 769
- thiolate-imidazolium ion pair, recombinant caricain, effect of charged residues 1267

Affinity chromatography

- immobilized metal ion, protein engineering of human glutathione-S-transferase M1-1 1115
- introduction of N-terminal histidine tail, protein expression in *Escherichia coli* 1277

Aggregation

- Escherichia coli* colicin A mutants, inclusion body 1495
- multivalent Fvs, characterization of single chain Fv oligomers 1017
- soluble anti-tumor sFv, periplasmic localization, induction conditions for production of in *Escherichia coli* 1401

Agrobacterium

- VirG structure modelling, signal transduction 905

AIDS

- drugs, HIV-1 protease-inhibitor interaction 309

Aldolase

- human, A and B chimeras 1387

Algorithm

- computer, protein function prediction, sequence motifs 165
- genetic, least-squares minimization, protein structure comparisons 475
- protein topology cartoons, motifs 31

Alignment

- divergence, evolutionary conservation of trypsin 57

Alkaline phosphatase

- modulation enzyme activity of alkaline phosphatase-epitope hybrid 509
- monodomain IgG Fc binding-alkaline phosphatase fusion protein, enzymatic activity 715

Amino acid composition

- globular proteins, protein folding classes 319
- starch binding and catalytic domains of glucoamylase, structure-function relationships 393

α -Amylase

- Bacillus stearothermophilus*, C-terminal protein truncation, substrate recognition 1255

Annexin I

- homology modelling, three-dimensional profile, solvation 1333

Antibodies

- humanization, binding activity of mAbs, non-CDR complementarity modulating residues 805
- humanization of anti-IL-2R, CDR graft 435
- humanization of mAb 60.3, L2 loop, CD18, antibody-antigen interaction 815
- multimerization of single chain Fv variants 1027
- reshaping human monoclonal antibody, CDR, toxins, peptides 1501
- single domain, camelid immunoglobulin V_H structure, molecular modelling 1129

Antibody engineering

- characterization of single chain Fv oligomers, linker design 1017
- chemical modification, pH on-off dependency of antibody binding activity 431

Antigen binding

- bifunctional hybrids of MalE and Ig variable domains 271

Apolipoprotein (a)

- expression and characterization of kringle IV types 1, 2 and 10 723

Arabinose binding protein

- novel substrate specificity, protein engineering, fluorescence titration 997

Aspergillus awamori

- amino acid deletions in glucoamylase, secretion, O-glycosylation 1109
- glucoamylase thermosensitive mutants, structural characterization 1005

Bacillus cereus

- phospholipase C catalytic mechanism, distance geometry calculations 571

Bacillus circulans

- site-directed mutagenesis of xylanase, thermostability 1379

Bacillus subtilis

- 3-isopropylmalate dehydrogenase chimera, three-dimensional structure 453
- lipases, structure-function relationships 523
- thermostability of neutral protease, surface loops 425

Bacteriophages

- overproduction of Mu C protein by removal of secondary structure at translation initiation region 1053

β -Barrels

- automation of identification and analysis, graph theory, unsupervised algorithm 1305

BC loop

- poliovirus coat protein VP1, insertions, chimeras 47

Binding activity

- antibody, pH on-off dependency, chemical modification by tetranitromethane 431

Binding affinity

- interaction of polyproline-based peptides with Abl-5H3, DOCK 1455
- protein-DNA interaction, assessment of mutational effect 1083

Binding constants

- free energy, endothiapepsin inhibitor binding 385

Binding domain

- cellulose and chitin, xylanase-endoglucanase fusion protein 117
- ricin B chain, mutational and structural analysis of lectin activity 1261

Binding protein

- calcium, *Nereis diversicolor*, chloramphenicol acetyltransferase fusion protein 125

Binding site

- receptor binding site of interleukin-1 β , mutational mapping 663

'Bio' Champollion

- dynamic programming regularization of secondary structure prediction 1197

Biosynthesis

- of artificial proteins *in vitro*, novel approach to protein design 1041

Calcitonin

- gene-related peptide, molecular modelling of the protein structure 1069

Calcium

- binding properties, calmodulin target peptide hybrid, NMR 109
- binding protein, *Nereis diversicolor*, cloning, expression and purification 125

Calcium binding site

- site-directed mutagenesis modifies properties of annexin I 689

Calmodulin

- molecular similarity, connected graph 331
- target peptide hybrid, calcium binding properties 109

Calorimetry

- cooperative deformation, β - α -barrel, thermal transition, molten globule 969
- protein folding of barnase and urea concentration 1089

Camelids

- immunoglobulin V_H structure, molecular modelling 1129

Cancer therapy

- B1 and B5 Fv fragments, *Pseudomonas* exotoxin 1509

Candida rugosa

- variability of isozymes, substrate specificity 531

Carboxypeptidase

- three-dimensional structure, functional environs, contour maps 1423

Carboxypeptidase Y

- introduction of acidic residues, protein stability, substrate specificity, pH dependence 911

Caricain

- recombinant, effect of charged residues, active site thiolate-imidazolium ion pair 1267

Catalytic activity

- site-directed mutagenesis of glutamate dehydrogenase, reactive cysteine, DTNB 1013

Catalytic mechanism

- phospholipase C in *Bacillus cereus*, distance geometry calculations 571

Catalytic triads

- papain active site 75

Cathepsin D

- substrate specificity, mutagenesis of active site, aspartic proteinase 495

Subject index

Cavities

intramolecular cavities in globular proteins, packing 613

CD4

HIV gp120 binding domains, molecular decoys, gene therapy 145

Cell cycle

cdc2/CDC28, p34 protein kinase, molecular modelling 243

Chaperonins

GroES and GroEL, overproduction, increased solubility of dihydrofolate reductase 925

Chemical labelling

cysteine engineering of charybdotoxin 503

Chemical modification

Staphylococcus hyicus lipases 579

tetranitromethane, nitrotyrosine residues, antibody binding activity 431

Chemical synthesis

γ -echistatin analogues, platelet aggregation 941

Chimeras

Bacillus subtilis and *Thermus thermophilus* 3-isopropylmalate dehydrogenase 453

human aldolase A and B chimeras 1387

poliovirus coat protein VP1 BC loop, foreign epitopes 47

Chimeric proteins

enzyme activity, alkaline phosphatase-epitope hybrid 509

immunoglobulin and scavenger receptor superfamily domains with domains 3 and 4 of CD4 515

xylanase-endoglucanase, cellulose and chitin binding domain 117

Choriogonadotropin

hormone-receptor recognition, computer modelling 205

Co-enzymes

specificity, 3-isopropylmalate dehydrogenase 401

Coiled-coil

molecular recognition, assembly of receptor ectodomains, interleukin-2, leucine zipper 1137

mutation in leucine zipper of GCN4 1097

protein stability, interhelical ion pairs, leucine zipper 1365

Complementarity determining region

reshaping human monoclonal antibody, toxins, peptides 1501

Computer modelling

humanization of anti-IL-2R, CDR graft 435

LH/CG receptor, hormone-receptor recognition 205

Conformation

amphipathic, conservation, secondary structure prediction, protein structural alignments 185

ligand binding, protein torsion angle changes 961

polypeptide backbone, constructing segments of protein structure 953

proteinase inhibitor TIMP, structural analysis, intrinsic fluorescence 1035

Conformational change

Escherichia coli aspartate aminotransferase mutant with increased enzymic activity 605

negative co-operativity of aspartate aminotransferase, site-directed mutagenesis 413

Conservation

proline residues, *Clostridium pasteurianum* [2(4Fe-4S)] 681

sequence, Ser/Thr and Tyr protein kinase family 849

Cooperativity

cooperative deformation *de novo* designed protein, β - α -barrel, thermal transition 969

Crystal structure

aspartate aminotransferase, wild type and mutant 405

fungal lipases, implications for structure-function relationships 551

Humicola lanuginosa lipases, substrate binding models using X-ray crystallography 543

molecular mechanics of HIV-1 protease-inhibitor interaction 309

TIM barrel-barrel enzyme hybrid, modular mutagenesis 945

β -Crystallin

assembly, role of sequence extensions, dimerization 1395

Crystallins

role of N-terminal arm in β A3/A1-crystallin association 445

Crystallization

rapid, T4 lysozyme, disulphide cross-linking 301

Cysteine proteinase

effect of electrostatic interactions, active site thiolate-imidazolium ion pair 1267

Cytochrome c

three-dimensional structure, functional environs, contour maps 1423

Cytokines

interleukin-13, predictive modelling, structure prediction 1077

Database

protein mutant, construction of 733

Deletions

Aspergillus awamori glucoamylase, O-glycosylation, secretion, thermostability 1109

Denatured state

protein stability, single substitution mutants, inter-residue contact energies, hydrophobic energy 1209

Dihydrofolate reductase

Escherichia coli, circularly permuted, tertiary protein structure 1373

Halobacterium volcanii, homology modelling, structure prediction 213

improving solubility by mutagenesis, inclusion bodies 933

increased solubility by overproduction of GroES and GroEL 925

Dimerization

β -crystallin assembly, role of sequence extensions 1395

Diphtheria toxin

transmembrane domain, amphipathic helix, hydrophobic face, fusion toxin 985

Distance geometry calculations

Bacillus cereus phospholipase C, DGEOM, GRID 571

secondary structure formation in model polypeptide chains 633

Disulphide bonds

cross-linking, rapid crystallization of T4 lysozyme 301

β -lactoglobulin thermostable variants 263

protein engineering interchain disulphide bonds, disulphide-stabilized Fv fragments 697

DNA flexibility

protein-DNA docking, Monte Carlo simulation 761

Docking

protein-DNA, Monte Carlo simulation 761

Domains

discontinuous, method for location, compactness 335

insertion, protein folding 1407

Drosophila

K10 repeat, solution structure, NMR 461

Dynamic programming

regularization, 'Bio' Champollion secondary structure prediction 1197

γ -Echistatin

solid-phase peptide synthesis of analogues, platelet aggregation 941

Ectothiorhodospira halophila

hyperexpression of gene encoding HiPIP, fusion protein 1145

Electrostatic interactions

active site thiolate-imidazolium ion pair, recombinant caricain 1267

Electrostatic properties

engineering of surface charges in a subtilisin, electrophoresis, ion-exchange 793

interhelical ion pairs, protein stability, leucine zipper 1365

Ellipsoid analysis

amino acid composition of globular proteins 319

Entropy

conformation, fusion entropy of protein side chains 149

Enzyme activity

lysozyme, mutagenesis, active site 743

modulation, alkaline phosphatase-epitope hybrid 509

papain, mutagenesis of residues remote from active site, role of two-domain interface 769

Enzyme kinetics

pH-dependent, overlapping ionizations, review 291

Epitope mapping

protein engineering of snake toxin, antibody-antigen binding 917

Epitopes

analysis, insulin, proinsulin 137

Escherichia coli

aspartate aminotransferase, negative co-operativity 413

aspartate aminotransferase, wild type and mutant substrate specificity, crystal structure 405

aspartate aminotransferase mutant, three-dimensional structure 605

induction conditions for production of soluble anti-tumour sFv,

periplasmic localization 1401

pyrophosphatase structure comparison, X-ray crystallography, sequence motif 823

pyrophosphatase structure comparison, X-ray crystallography, sequence motif 1173

regulatory chain of aspartate transcarbamoylase, alanine scanning mutagenesis 673

- Evolution**
divergence, evolutionary conservation of trypsin 57
homologous protein sequences, amino acid substitution, Dayhoff matrices 1323
- Factor IX**
human, protein engineering of hydrophobic domain, clotting factors 1121
- Fc binding domain**
gene synthesis and functional expression of recombinant monodomain IgG Fc binding protein 705
monodomain IgG Fc binding-alkaline phosphatase fusion protein 715
- Ferredoxin**
conservation of proline residues, *Clostridium pasteurianum* 2[4Fe-4S], electron transfer 681
hyperexpression of gene encoding HiPIP, fusion protein 1145
- Fingerprinting**
G protein-coupled receptors, sequence alignment 195
- Fluorescence titration**
novel substrate specificity of arabinose binding protein 997
- Footprinting**
Drosophila K10 repeat DNA-protein interactions 461
- Fourier transform**
fast, Fourier-Green function, effects of solvation 359
- Fungi**
lipases, protein crystallography and implications for structure-function relationships 551
- Fusion protein**
bifunctional hybrids of MalE and Ig variable domains, antigen binding 271
hyperexpression of gene encoding HiPIP 1145
monodomain IgG Fc binding-alkaline phosphatase 715
Nereis diversicolor calcium binding protein and chloramphenicol acetyltransferase 125
xylanase-endoglucanase, engineered bifunctional enzyme 117
- Fv fragments**
cloning of B1 and B5 Fv fragments, immunotoxins, cancer therapy 1509
interchain disulphide bonds, recombinant immunotoxins containing disulphide-stabilized Fv fragments 697
multimerization of single chain Fv variants 1027
multivalent Fvs, characterization of single chain Fv oligomers 1017
- G-proteins**
fingerprinting G protein-coupled receptors, sequence alignment 195
- Gene therapy**
CD4, HIV gp120 binding domains, molecular decoys 145
- Geotrichum candidum***
positional and fatty acid specificity of lipases 585
- Globular proteins**
intramolecular cavities, packing 613
local polarity analysis, determination of incorrect folding 627
- Glucoamylase**
amino acid deletions, *Aspergillus awamori*, O-glycosylation, thermostability 1109
reading-frame shift in *Saccharomyces* glucoamylase improves sequence alignment with other glucoamyl 1281
specificity, sequence analysis 1479
starch binding and catalytic domains, structure-function relationships 393
structural similarities, hydrophobic cluster analysis 749
thermosensitive mutants of *Aspergillus awamori*, structural characterization 1005
- Glutamate dehydrogenase**
site-directed mutagenesis, catalytic activity, reactive cysteine, DTNB 1013
- Glutathione-S-transferase**
human class Mu, structure refinement, homology modelling 831
protein engineering of human glutathione-S-transferase M1-1, metal binding site 1115
- Glyceraldehyde 3-phosphate dehydrogenase**
Thermotoga, thermostability, ion pairs 1471
- Glycerol derivatives**
homochiral, lipase-catalysed racemate resolution 589
- Glycosylation**
glucoamylases, structural similarities, hydrophobic cluster analysis 749
- Grafting**
CDR, humanization of anti-IL-2R 435
- Haemoglobin**
recombinant, incorporation of sulpham 281
- Halophilic adaptation**
Halobacterium volcanii dihydrofolate reductase, homology modelling 213
- Helix**
cap stability, mutagenesis of N-capping box 777
- Helix-loop-helix**
sequence motifs, Epstein-Barr virus 1433
- Helix-turn-helix**
LexA, PrfA and Fur, DNA recognition 1449
- Helix dipole**
effect of on protein structure, helix packing, ion binding 471
- Helix packing**
transmembrane helices, bacteriorhodopsin, structure prediction 1221
- Hepatocyte growth factor**
HGF/NK1 region, structure-function relationships 895
- Herpes simplex virus type-1**
thymidine kinase, random mutagenesis 83
- HIV**
construction of active RNase H domain of reverse transcriptase, hybrid proteins 1103
HIV-1 IIB gp120 V3 loop, enzyme activity of alkaline phosphatase epitope hybrid 509
molecular mechanics of HIV-1 protease-inhibitor interaction, crystal structure 309
protease, molecular dynamics simulation, peptide substrate 1353
protease cleavage sites, 2-4-6 subsite coupled effect 65
- Homology**
families of proteins with similar total structure 1283
- Homology modelling**
cysteine proteinase inhibitor, structural thermodynamics 977
dihydrofolate reductase, structure prediction 213
novel procedure for structure refinement, human class Mu glutathione-S-transferase 831
structural conservation of protein structure 173
structure-function properties of α -hordothionin, crambin, high lysine analogues 1485
structure prediction, simulated annealing, side chain conformation 235
- α -Hordothionin**
homology modelling with crambin, structure-function properties, high lysine analogues 1485
- Human rhodopsin**
structure prediction, seven-helix membrane proteins, bacteriorhodopsin 1221
- Humanization**
binding activity of mAbs, non-CDR complementarity modulating residues 805
mAb 60.3, L2 loop, CD18 815
- Humicola lanuginosa***
lipases, substrate binding models using X-ray crystallography 543
- Hydrophobic core**
fungal microbial RNase, non-polar nuclei, protein stability 1189
- Hydrophobic effect**
solute-solvent interaction, surface tension 371
- IgG**
gene synthesis and functional expression of recombinant monodomain IgG Fc binding protein 705
monodomain IgG Fc binding-alkaline phosphatase fusion protein, binding activity 715
- Immunoassays**
insulin, proinsulin, epitope analysis 137
- Immunoglobulin**
camelid immunoglobulin V_H structure, single domain antibody 1129
- Immunotoxins**
 α -haemolysin, protease-activated trigger, mutagenesis 91
Pseudomonas exotoxin, B1 and B5 Fv fragments, cancer therapy 1509
- Inclusion bodies**
 β -lactamase, secondary structure, Raman spectroscopy 131
- Insertions**
poliovirus coat protein VP1 BC loop, foreign epitopes 47
- Insulin**
deuterated, mass spectrometry, semisynthesis, electrospray 285
proinsulin, epitope analysis, immunoassays 137
- Interactions**
DNA-protein, *Drosophila K10* repeat 461

Subject index

Interferon

IFN γ structural motif, CD spectra 863

Interleukin-1 β

receptor binding site, mutants, mutational mapping 663

Interleukin-2

coiled-coil molecular recognition, assembly of receptor ectodomains 1137

Ion channels

pore-forming domain of voltage-gated potassium channel protein 255
potassium, cysteine engineering of charybdotoxin 503
potassium, selectivity and structure prediction, ROMK1 pore, *Shaker* 859

Ion pairs

thermostability of glyceraldehyde 3-phosphate dehydrogenase 1471

3-Isopropylmalate dehydrogenase

co-enzyme specificity 401

Isozymes

human aldolase A and B chimeras 1387
variability and substrate specificity of *Candida rugosa* lipases 531

Kringle

apolipoprotein (a) kringle IV types 1, 2 and 10, expression and characterization 723

Lactobacillus casei

dihydrofolate reductase, effects of amino acid substitution on structure and function 783

Lactococcus lactis

cell envelope proteinase, protein engineering of catalytic domain 991

β -Lactoglobulin

thermostable variants, disulphide bonds 263

Lens proteins

β -crystallin assembly, role of sequence extensions 1395

Leucine zipper

mutation of in GCN4 1097

Ligand analysis

immunoglobulin and scavenger receptor superfamily domains, chimeric proteins with domains 3 and 4 of CD4 515

Lipases

Candida rugosa, variability of isozymes, substrate specificity 531
fungal, protein crystallography and implications for structure-function relationships 551

Geotrichum candidum, positional and fatty acid specificity 585

homochiral glycerol derivatives by lipase-catalysed racemate resolution 589

hormone-sensitive, structure, function, evolution and expression, three-dimensional structure 537

Humicola lanuginosa, substrate binding models using X-ray crystallography 543

novel pancreatic lipases from guinea-pig and coypu, phospholipase activity 563

Pseudomonas aeruginosa and *Bacillus subtilis*, three-dimensional structure, crystallization 523

Pseudomonas glumae, protein structure, triacylglycerol acylhydrolase 559

Staphylococcus hyicus, inactivation of by chemical modification and mutagenesis, active site serine 579

Loops

HIV-1 IIB gp120 V3 loop 509

Rhodobacter capsulatus L3 loop, molecular dynamics simulation, porins 487

Lysozyme

enzyme activity, active site, mutagenesis 743

human, function and genesis, engineering 735

role of net charge on renaturation, sulphhydryl-disulphide interchange 1249

Machine learning

topological rules, packing of β -strands, modelling 1295

Major house dust mite allergen *Der p 1*

protein structure validation, cysteine proteinases 869

Mass spectrometry

deuterated insulin, semisynthesis, electrospray 285

Membrane proteins

sequence analysis, fingerprints, structural motif 841

Metal binding site

human glutathione-S-transferase M1-1, immobilized metal ion affinity chromatography 1115

1526

Modelling

Agrobacterium VirG structure, signal transduction 905

annexin I three-dimensional profile, solvation, conformation 1333

comparative, major house dust mite allergen *Der p 1*, protein structure validation 869

predictive, interleukin-13, structure prediction 1077

three-dimensional model of thromboxane A₂ synthase, cytochrome P450, prostaglandin 1345

Modification

chemical, tyrosine residues, isopropylmalate dehydrogenase 99

homology modelling of α -horodithionin with crambin, structure-function properties, high lysine analogues 1485

Molecular decoys

CD4, HIV gp120 binding domains, gene therapy 145

Molecular docking

thermodynamic quantities, Fourier-Green function 359

Molecular dynamics simulation

binding constants, endothiapepsin inhibitor binding 385

HIV-1 protease, peptide substrate 1353

properties of *Rhodobacter capsulatus* L3 loop, porins 487

Molecular interactions

(MeBm₂)¹-cyclosporin-cyclophilin A, immunosuppression 597

antibody-antigen, protein stability 371

Molecular modelling

camelid immunoglobulin V_H structure 1129

dihydrofolate reductase, improving solubility by mutagenesis 933

hepatocyte growth factor, HGF/NK1 region 895

interaction of polyproline-based peptides with Abl-5H3 1455

p34 protein kinase, cell cycle 243

pore-forming domain of voltage-gated potassium channel protein 255

protein design, geometric recognition 1411

protein structure of calcitonin gene-related peptide 1069

Molecular similarity

calmodulin, connected graph 331

Molecular surface recognition

receptor-ligand interaction, computer vision-based technique 39

Monte Carlo

fusion entropy of protein side chains 149

sampling, 2-4-6 subsite coupled effect, protease cleavage sites 65

Monte Carlo simulation

protein-DNA docking, DNA flexibility 761

Motifs

sequence, protein function prediction, computer algorithm 165

Multimerization

single chain Fv variants 1027

Mutagenesis

α -haemolysin protease-activated trigger, pore-forming protein 91

α -haemolysin, zinc-activated switch 655

alanine scanning, role of regulatory chain of *E. coli* aspartate

transcarbamoylase 673

cassette, *trp* repressor, protein-ligand interaction, free energy perturbation 1239

cathepsin D active site, substrate specificity 495

chymotrypsin inhibitor-2, protein stability 103

cysteine engineering of charybdotoxin 503

IgG binding protein, fluorescence spectroscopy, protein stability 1463

improving solubility of dihydrofolate reductase 933

in vitro, β A3/A1-crystallin association 445

Lactobacillus casei dihydrofolate reductase, effects of amino acid substitution on structure and function 783

lysozyme, enzyme activity, active site 743

modular, TIM barrel-barrel enzyme hybrid 945

N-capping box, helix cap stability, chymotrypsin inhibitor 2 777

random, Herpes simplex virus type-1 thymidine kinase 83

random, thermosensitive mutants of *Aspergillus awamori* glucoamylase 1005

residues remote from active site, papain 769

site-directed calcium binding site, properties of annexin I 689

site-specific, *Pseudomonas fluorescens* *p*-hydroxybenzoate hydroxylase 801

Staphylococcus hyicus lipases 579

Mutational analysis

hepatocyte growth factor, HGF/NK1 region 895

Mutational effect

assessment of, binding affinity of protein-DNA interaction 1083

N-terminal arm

role of in β A3/A1-crystallin association 445

- NMR**
Drosophila K10 repeat solution structure 461
- NMR spectroscopy**
 dihydrofolate reductase, amino acid substitution 783
- Papain**
 active site, catalytic triads 75
 enzyme activity, mutagenesis of residues remote from active site 769
- Peptide synthesis**
 leucine zipper of GCN4 1097
- Peptides**
 reshaping human monoclonal antibody, CDR, toxins 1501
- Phospholipase activity**
 novel pancreatic lipases from guinea-pig and coypu 563
- Phospholipase C**
 catalytic mechanism in *Bacillus cereus*, distance geometry calculations 571
- Point mutations**
 local changes in protein structure, predictive rules 1203
- Polarity**
 local polarity analysis of globular proteins, determination of incorrect folding 627
- Poliovirus**
 coat protein VP1 BC loop, insertions, chimeras 47
- Pore**
 α -haemolysin pore-forming protein, protease-activated trigger, mutagenesis 91
 pore-forming protein α -haemolysin has a zinc-activated switch 655
- Porins**
Rhodobacter capsulatus L3 loop, molecular dynamics simulation 487
- Positional specificity**
 fatty acid specificity of *Geotrichum candidum* lipases 585
- Property profile matching**
 sequence-structure relationships, protein databases 23
- Proteases**
Bacillus subtilis neutral protease, surface loops 425
 cleavage sites, HIV, Monte Carlo sampling 65
- Protein databases**
 sequence-structure relationships, property profile matching 23
- Protein-DNA interaction**
 binding affinity, assessment of mutational effect 1083
- Protein design**
 β - α -barrel, cooperative deformation, thermal transition 969
 calmodulin target peptide hybrid, calcium binding properties, NMR 109
 endothiapepsin, inhibitor binding, molecular dynamics simulation 385
 novel approach to artificial proteins, biosynthesis *in vitro* 1041
 novel proteins, geometric recognition 1411
- Protein engineering**
 domain insertion, protein folding 1407
Escherichia coli colicin A mutants, aggregation, hydrophobic cavity 1495
 glucoamylase, starch hydrolases 1479
 human glutathione-S-transferase M1-1, metal binding site 1115
 hydrophobic domain of human factor IX, clotting factors 1121
 interchain disulphide bonds, disulphide-stabilized Fv fragments 697
 modular mutagenesis of TIM barrel-barrel enzyme hybrid, crystal structure 945
 novel proteins, distance matrix, geometric recognition, GRAFT 1411
 novel substrate specificity of arabinose binding protein 997
 recombinant monodomain IgG Fc binding protein 705
 site-directed mutagenesis of snake toxin, antibody-antigen binding 917
 society of Japan, abstracts of 6th annual meeting 1151
- Protein expression**
 secretory protein in *Escherichia coli*, N-terminal histidine tail 1277
- Protein folding**
 barnase, urea concentration, protein stability 1089
 classes, amino acid composition of globular proteins 319
 determination of incorrect folding of globular proteins, local polarity analysis 627
 domain insertion, protein engineering 1407
 IgG binding protein, fluorescence spectroscopy 1463
 kinetic and equilibrium intermediates, phase transitions 593
 secondary structure formation in model polypeptide chains, hydrophobic effect 633
 sequence alignment 1
- Protein function**
 circularly permuted dihydrofolate reductase, tertiary protein structure 1373
 genesis of proteins, human lysozyme 735
 prediction, sequence motifs, computer algorithm 165
- Protein kinase**
 Ser/Thr and Tyr family, sequence conservation, modelling 849
- Protein-ligand interaction**
 cassette mutagenesis of *trp* repressor, free energy perturbation 1239
- Protein stability**
 chymotrypsin inhibitor 2, mutagenesis of N-capping box, helix cap stability 777
 chymotrypsin inhibitor-2, reverse turns, salt bridges 103
 coiled-coil, interhelical ion pairs, leucine zipper 1365
Escherichia coli colicin A mutants, hydrophobic cavity 1495
 fungal microbial RNase, non-polar nuclei, hydrophobic core 1189
 fusion entropy of protein side chains 149
 hydrocarbon solubility, solute-solvent interaction 371
 IgG binding protein, fluorescence spectroscopy 1463
 introduction of acidic residues into carboxypeptidase Y 911
 single substitution mutants, denatured state, inter-residue contact energies 1209
- Protein structure**
 (MeBm₂t)¹-cyclosporin-cyclophilin A, molecular interactions 597
 adaptation, protein cores, structural conservation 173
Agrobacterium VirG 905
 algorithm, protein topology cartoons, motifs 31
 β -barrels, identification and analysis, graph theory, unsupervised algorithm 1305
 calcitonin gene-related peptide, molecular modelling 1069
 comparisons, genetic algorithm, dynamic programming, least-squares minimization 475
 constructing segments, systematic search procedure 953
Drosophila K10 repeat solution structure 461
 effect of helix dipole, hydrogen bonding, ion binding 471
 Epstein-Barr virus basic helix-loop-helix sequence motifs 1433
Escherichia coli pyrophosphatase, X-ray crystallography, structure comparison, sequence motif 1173
 intramolecular cavities in globular proteins 613
 local changes, predictive rules, point mutations 1203
 modelling, packing of β -strands, machine learning 1295
 molecular dynamics simulation of HIV-1 protease, peptide substrate 1353
 novel approach to protein design, artificial proteins, biosynthesis *in vitro* 1041
 pore-forming domain of voltage-gated potassium channel protein 255
 protein folding, sequence alignment 1
Pseudomonas glumae lipases, conformational changes, hydrolase fold 559
 pyrophosphatase, X-ray crystallography, structure comparison, sequence motif 823
 reverse turns, salt bridges, chymotrypsin inhibitor-2 protein stability 103
 self-optimized secondary structure prediction, amino acid sequences 157
 similarities, C α distance comparison 1175
 structural similarities in glucoamylases, hydrophobic cluster analysis 749
 tertiary, circularly permuted dihydrofolate reductase 1373
 tertiary, functional environs, carboxypeptidases A and B, cytochrome c 1423
 tertiary structure, families of proteins with similar total structure, statistical geometry 1283
 three-dimensional, glutathione-S-transferase, structure refinement 831
 validation, environmental amino acid propensity table 869
- Protein threading**
 protein threading problem is NP-complete, sequence-structure alignment 1059
- Protein topology**
 cartoons, algorithm 31
- Protein truncation**
 C-terminal, α -amylase, substrate recognition 1255
- Proteinase**
 cysteine proteinase inhibitor, stefins, homology modelling, structural thermodynamics 977
 inhibitor, TIMP, conformational analysis, intrinsic fluorescence 1035
Lactococcus lactis, protein engineering of catalytic domain, substrate specificity, surface loop 991
- Pseudomonas aeruginosa***
 lipases, structure-function relationships 523
- Pseudomonas fluorescens***
 thiol reactivity of *p*-hydroxybenzoate hydroxylase 801
- Pseudomonas glumae***
 lipases, protein structure, triacylglycerol acylhydrolase 559
- Pyrophosphatase**
 X-ray crystallography, structure comparison, sequence motif 823

Subject index

- X-ray crystallography, structure comparison, sequence motif 1173
- Query language**
macromolecular, protein structure, pattern expression, protein data bank 1311
- Racemate resolution**
lipase-catalysed, homochiral glycerol derivatives 589
- Raman spectroscopy**
 β -lactamase inclusion bodies secondary structure 131
- Receptor**
ectodomains, expression and structure, interleukin-2 1137
receptor binding site of interleukin-1 β , mutational mapping 663
structure, G protein-coupled receptors, serotonin 1441
- Receptorligand interaction**
computer vision-based technique 39
- Receptors**
G protein-coupled, fingerprinting, sequence alignment 195
LH/CG receptor, hormone-receptor recognition, computer modelling 205
- Recombinant proteins**
apolipoprotein (a) kringle IV types 1, 2 and 10, expression and characterization 723
- Regulatory chain**
E. coli aspartate transcarbamoylase, alanine scanning mutagenesis 673
- Renaturation**
role of net charge, lysozyme, aggregation 1249
- Reverse transcriptase**
construction of active RNase H domain, hybrid proteins 1103
- Rhodobacter capsulatus***
properties of L3 loop, molecular dynamics simulation, porins 487
- Ricin B chain**
binding domain, mutational and structural analysis of lectin activity 1261
- mRNA**
secondary structure, overproduction of Mu C protein 1053
- RNase**
fungal microbial, non-polar nuclei, protein stability 1189
- RNase H**
construction of active domain, HIV, reverse transcriptase, hybrid proteins 1103
- Saccharomyces***
reading-frame shift in glucoamylase improves sequence alignment with other glucoamylases 1281
- Secondary structure**
 β -lactamase inclusion bodies, Raman spectroscopy 131
formation in model polypeptide chains, distance geometry calculations 633
overproduction of Mu C protein by removal of at translation initiation region 1053
prediction, conservation of amphipathic conformations, protein structural alignments 185
structure prediction of α -helices, helix capping rules 645
- Secretion**
amino acid deletions in *Aspergillus awamori* glucoamylase, O-glycosylation 1109
- Secretory protein**
Escherichia coli, protein expression, N-terminal histidine tail 1277
- Sequence-structure alignment**
protein threading problem is NP-complete 1059
- Sequence-structure relationships**
property profile matching, protein databases 23
- Sequence alignment**
fingerprinting G protein-coupled receptors 195
homologous protein sequences, amino acid substitution, Dayhoff matrices 1323
multiple, compensating changes 341
multiple, correlated mutations, structure prediction 349
mutational and structural analysis of lectin activity in binding domain of ricin B chain 1261
protein folding 1
reading-frame shift in *Saccharomyces* glucoamylase 1281
Ser/Thr and Tyr protein kinase family, sequence conservation, modelling 849
- Sequence analysis**
fingerprints, pattern recognition, PRINTS database 841
- Sequence comparison**
LexA repressor, CAP, iron uptake regulator 1449
- Sequence divergence analysis**
seven-helix membrane proteins, bacteriorhodopsin 1221
structure prediction of seven-helix membrane proteins 1231
- Sequence extensions**
role of in assembly of β -crystallin 1395
- Sequence motifs**
basic/helix-loop-helix, principal component analysis 1433
- Signal transduction**
Agrobacterium VirG mutants, VirG structure modelling 905
molecular dynamics, G protein-coupled receptors, serotonin 1441
- Simulated annealing**
method for assessing solvent treatment, structure prediction 221
structure prediction, homology modelling, side chain conformation 235
- Single-chain antibodies**
soluble anti-tumour sFv, aggregation, periplasmic localization 1401
- Site-directed annexin I**
mutagenesis of calcium binding site modifies properties 689
- Site-directed mutagenesis**
carboxypeptidase Y, introduction of acidic residues 911
glutamate dehydrogenase, catalytic activity, reactive cysteine, DTNB 1013
humanization of anti-IL-2R, CDR graft 435
3-isopropylmalate dehydrogenase, co-enzyme specificity 401
negative co-operativity of aspartate aminotransferase 413
snake toxin, three-dimensional structure 917
T4 lysozyme crystallization, disulphide cross-linking 301
tyrosine residues, 3-isopropylmalate dehydrogenase 99
xylanase, thermostability, introduction of disulphide bonds 1379
- Solubility**
dihydrofolate reductase, increased solubility by overproduction of GroES and GroEL 925
dihydrofolate reductase, mutagenesis 933
- Solvation**
effects, thermodynamic quantities of molecular docking, Fourier-Green function 359
homology modelling of annexin I, three-dimensional profile, conformation 1333
- Solvent effect**
method for assessing solvent treatment, simulated annealing 221
- SOPM**
secondary structure prediction, amino acid sequences 157
- Staphylococcus hyicus***
inactivation of lipases by chemical modification and mutagenesis, active site serine 579
- Stefins**
structural thermodynamics, homology modelling 977
- Structural analysis**
proteinase inhibitor TIMP, conformational analysis, intrinsic fluorescence 1035
- Structural motif**
IFN γ , CD spectra 863
sequence analysis, pattern recognition, PRINTS database 841
- Structure-activity studies**
human tumour necrosis factor, lymphotoxin 5
- Structure-function relationships**
fungal lipases, protein crystallography 551
glucoamylase, amino acid composition 393
novel pancreatic lipases from guinea-pig and coypu 563
Pseudomonas aeruginosa and *Bacillus subtilis* lipases 523
- Structure prediction**
 α -helices, Fourier transform, substitution tables 645
'Bio' Champollion, dynamic programming regularization 1197
correlated mutations, residue contacts, distance geometry 349
dihydrofolate reductase, homology modelling 213
human rhodopsin, seven-helix membrane proteins 1231
IFN γ structural motif, CD spectra 863
interleukin-13, predictive modelling 1077
local changes in protein structure, point mutations 1203
modelling, packing of β -strands, machine learning 1295
multiple sequence alignment, conservation 341
protein-DNA docking, Monte Carlo simulation 761
protein threading problem is NP-complete, sequence-structure alignment 1059
selectivity, computer simulations, potassium ion channels, ROMK1 pore, Shaker 859
self-optimized, amino acid sequences 157
side chain conformation, simulated annealing, homology modelling 235
solvent models, method for assessing solvent treatment 221

Substitution

- amino acid, assessment of mutational effect on binding affinity of protein-DNA interaction 1083
- mutants, protein folding, inter-residue contact energies 1209

Substrate recognition

- α -amylase, C-terminal protein truncation 1255

Substrate specificity

- arabinose binding protein, protein engineering 997
- aspartate aminotransferase, wild type and mutant 405
- cathepsin D, mutagenesis of active site 495
- cell envelope proteinase, catalytic domain, autoprocessing 991
- introduction of acidic residues into carboxypeptidase Y 911

Subtilisin

- engineering of surface charges, effects on electrostatic properties 793

Sulphaem

- incorporation, recombinant haemoglobin 281

Superfamilies

- immunoglobulin and scavenger receptor superfamily domains, chimeric proteins 515

Surface charges

- engineering of in a subtilisin, effects on electrostatic properties 793

Surface loops

- thermostability of *Bacillus subtilis* neutral protease 425

Thermal stability

- β -lactoglobulin, disulphide bonds 263

Thermostability

- amino acid deletions in *Aspergillus awamori* glucoamylase 1109
- α -amylase, C-terminal protein truncation 1255
- Bacillus subtilis* and *Thermus thermophilus* 3-isopropylmalate dehydrogenase chimeras, X-ray crystallography 453
- Bacillus subtilis* neutral protease, surface loops 425
- cysteine proteinase inhibitor, molten globule 977
- xylanase, site-directed mutagenesis, introduction of disulphide bonds 1379

Thermotoga

- glyceraldehyde 3-phosphate dehydrogenase, ion pairs, thermostability 1471

Thermus thermophilus

- 3-isopropylmalate dehydrogenase chimera, three-dimensional structure 453
- 3-isopropylmalate dehydrogenase, co-enzyme specificity 401

Thiol

- cysteine engineering of charybdotoxin 503
- reactivity of *p*-hydroxybenzoate hydroxylase from *Pseudomonas fluorescens* 801

Three-dimensional structure

- Bacillus subtilis* and *Thermus thermophilus* 3-isopropylmalate dehydrogenase chimeras 453
- Escherichia coli* aspartate aminotransferase mutant, X-ray crystallography 605
- hormone-sensitive lipases 537
- human rhodopsin, structure prediction of seven-helix membrane proteins, helix packing 1231
- interleukin-13, predictive modelling 1077
- macromolecular query language, pattern expression, protein data bank 1311
- similarities, $C\alpha$ distance comparison 1175

Thromboxane A_2 synthase

- three-dimensional model, substrate binding pocket 1345

Thymidine kinase

- Herpes simplex virus type-1, random mutagenesis 83

TIM barrel

- hybrid, modular mutagenesis, crystal structure 945

Topological equivalence

- protein structure comparisons, dynamic programming 475

Torsion angle

- changes, protein ligand binding 961

Transamination

- aspartate aminotransferase, negative co-operativity 413
- aspartate aminotransferase, substrate specificity 405

Transcription activator

- mutation in leucine zipper of GCN4 1097

Transmembrane domain

- diphtheria toxin, amphipathic helix, hydrophobic face, fusion toxin 985

Transmembrane proteins

- G protein-coupled receptors, receptor structure 1441

trp repressor

- cassette mutagenesis, protein-ligand interaction, free energy perturbation 1239

Trypsin

- evolutionary conservation 57

Tumour necrosis factor

- human, structure-activity studies 5

Urea

- concentration of, barnase protein stability 1089

X-ray crystallography

- (MeBm₂)¹-cyclosporin-cyclophilin A, protein-peptide molecular interactions 597
- Bacillus subtilis* and *Thermus thermophilus* 3-isopropylmalate dehydrogenase chimeras 453

Xylanase

- Bacillus circulans*, disulphide bonds 1379
